## THE PLEASURE OF LIVING

**Célere Sunrise**, is located in the municipal district of Mijas, on the Western Costa del Sol, a town that combines to perfection sun-and-beach tourism and its residential character.

Its privileged geographical location, between the sea and the hills, endows it with countless attractions. The climate is very mild in winter and moderately hot in summer.

The sea of the coast of Mijas has great biodiversity, with a large number of Atlantic and Mediterranean species.

### Gastronomy

Mijas' gastronomy is very rich and varied, offering a contrast between the traditional Andalusian image and an adaptation to new trends, without losing the essence of these lands.

Its coastal location provides all types of fresh fish and seafood that reach the ports every day, served with the sweet wines of the Denomination of Origin Málaga and Arab-style pastries.

In addition, you can enjoy restaurants of recognised prestige that create dishes made with top-quality local produce.

### A place with a cultural tradition

The Mijas Cove boasts a historical heritage that is reflected in its four towers: the Torre de Calahonda, the Torre Batería de la Cala del Moral, the Torre de Calaburras (16th century) and the Torre Nueva de la Cala del Moral (19th century).

In its old town you will discover many places to visit, such as the remains of the Arab Wall or the Chapel of the Virgen de la Peña.

Other places of historical note are the Flour Mill, the Historical-Ethnological Museum or the Contemporary Art Centre.

## ENERGY RATING

Vía Célere creates spaces that adapt to your needs. We create buildings of low energy consumption, highly insulated and weatherproofed.

We build homes with latest-generation technology, developed for comfortable everyday use.

This classification signifies an estimated energy saving of 93% and therefore an important economic saving, taking as reference a home with energy efficiency classification "F".

The building has a "B" Energy Efficiency Classification, which means a reduction of CO<sub>2</sub> emissions and a significant reduction of the building's energy demand (heating, cooling and sanitary hot water).

The estimated saving, adding the annual energy cost of gas and electricity, could be up to €995.\*

## Consultant Sale

The change of economic scenario forces us to make a reflection on a different perspective of the sales model.

In the information age, in which with a single click we have a vast range of options without leaving home, it is essential to differentiate yourself and return to the model of personalised sale, in which the commercial agent plays a role of advisor and not of seller.

The most important factor is to LISTEN to the customer, to know their circumstances and detect the true requirements they express, in order to offer a product that meets their expectations.

## Interior design

We know how important it is for our clients to feel their home and the common areas of their development as a special space where they can build unforgettable memories.

Therefore, at Vía Célere we work with the best interior designers to design and decorate these spaces, providing all their vision and experience based on the latest trends.

At Vía Célere we can put you in contact with the interior designer of your development if you wish, so that they can make your home a unique space.

## célere cities

The property sector is key to the development of cities. Célere Cities is our vision for the future of cities, contributing jointly with our stakeholders to the creation of urban environments that are eco-friendlier and more respectful of the social environment.

**Together with UAM,** we have created the Observatory for Environmental Sustainability of Residential Buildings, the first study of which has comprised the water footprint of residential building in Spain.

At Vía Célere, we undertake to refund a percentage of our blue water footprint each year to support social projects related with the improvement of water management.

**Together with Ashoka,** we promote "Future Cities", a project to support young social entrepreneurs in the sustainability challenges that cities face these days.

Through a mentoring process with our employees, we make all our knowledge and experience available to these young people and their projects.
