Relocating to Spain is a dream for many—sunshine, culture, great food, and a relaxed way of life. But making that dream a reality takes more than just buying a property. It takes expert guidance, careful planning, and a team who genuinely cares.

At Private Client Consultancy Property, we do it all—property search, legal work, financial structuring, insurance, and more—all under one roof. Here's how we make moving to Spain simple, stress-free, and fully tailored to your needs.

Step 1: Getting to Know You

This isn't just about property—it's about people

We begin with a personal consultation. This isn't a sales pitch—it's a genuine conversation. We want to understand:

- Why you're moving to Spain
- What lifestyle you're hoping to create
- Your preferred locations (or if you're still exploring)
- Budget, timelines, and property must-haves
- Family, work, retirement, or investment goals

We also advise on early-stage considerations like residency options, tax implications, and whether to purchase in personal name or through a structure.

Finding a home that fits your lifestyle

With your brief in hand, we'll search across our network of trusted agents and developers to find homes that truly match your lifestyle—not just your budget. You'll receive a handpicked shortlist with detailed insights into each area.

Depending on your needs, we can arrange:

- In-person viewings or bespoke viewing trips
- Virtual tours with honest, detailed commentary
- Advice on schools, local amenities, and transport
- Insider knowledge of the Costa del Sol and beyond
